### **Reasons for Allowance**

1. The following is an examiner's statement of reasons for allowance: As to claims 1 to 6, while the prior art does teach flexible printed circuit board units with thermal components, such as IC chips for example, and thermally conductive material to control the build up of heat, the prior art of record neither teaches nor suggest the claimed combination of a flexible electrically isolator sheet, thermal component, thermally conductive material, electrically conductive material, and thermal insulating material and their claimed positions relative to each other. As to claims 7 to 9, the prior art of record neither teaches nor suggest the claimed arrangement of an actuator block having first and second surfaces with the second surface having a lower level than the first, a thermally conductive plate with first and second areas received on the first and second actuator block surfaces respectively, a thermally insulating material received on the second area of the thermally conductive plate, and a flexible printed circuit board flush with the thermally insulating material and the thermally conductive plate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
